

accessible from the outside of said [socket] receptor body,

a pair of locking elements mounted in said [socket] receptor body in operative relationship to said actuator means at a position between the spaced prongs for selectively engaging the punched holes of the male plug locking the prongs of the male plug to said [socket] receptor body,

*B1  
cont*  
said actuator means being movable to a first position for permitting insertion and removal of the prongs relative to said locking elements, and

said actuator means being movable to a second position in said receptor for urging said pair of locking elements in opposite directions into locking contact with the prongs of the male plug.

Respectfully submitted,

*Edward D. Gilhooly*
